

Unleash the Power of Cloud Data Management

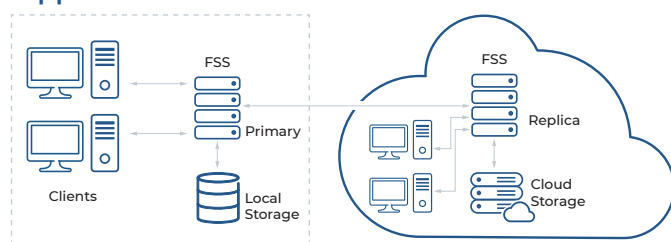

Achieve mastery over your data with FalconStor in the Cloud.

One vendor-agnostic platform. The full spectrum of cloud use cases. Continually protect, optimize, recover, locate, analyze, and scale data and storage resources across any environment – physical, virtual, cloud, hyper-converged, and hybrid cloud.

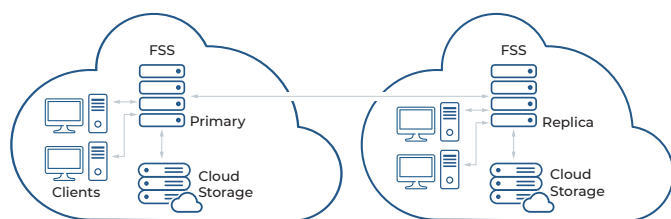

Use the cloud as your secondary copy of data for the ultimate in low-cost protection and site security.

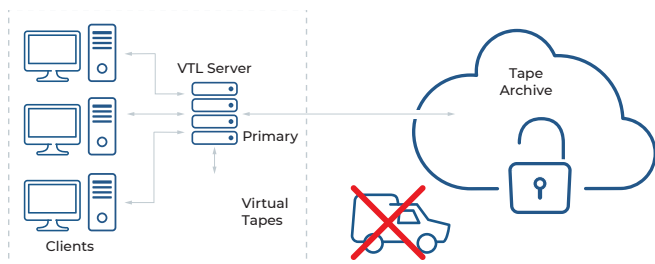

Use FalconStor to migrate your storage and workspaces to the cloud to eliminate data center equipment expenses, maintenance, and support.

Protect your data in the cloud by replicating to other cloud sites or vendors for max data security and insurance against cloud pricing changes.

Export tapes to the cloud and stop physically moving tapes offsite for storage.
